**CUKUROVA**<sup>®</sup>  
polistren dekor

[www.cukurovapolistren.com.tr](http://www.cukurovapolistren.com.tr)

Çukurova Polistren, Hazır Kartonpiyer, EPS Tavan Plakası, Lamba Göbekleri, Desenli Kartonpiyer, Dış Cephe Söve, Denizlik, Fuga, Sütun, Kaide, Payanda vb. dekorasyon ürünlerinin yanı sıra; Mantolama Board, Asmolen ürünleri ile de izolasyon grubuna hitap etmektedir.

Değişen dünya düzeni ve ekonomik değişiklikleri çok iyi okuyarak, satış ve yatırım stratejileri belirledik . Bunları özenle uyguladık.

İhracatta bölgemizde ve sektörümüzde sayılı firmalardan biri olarak ve buna bağlı artan istihdamımızla ülke ekonomisine fayda sağladık, sağlıyoruz, sağlayacağız...

Hem sermayemizi hem de piyasada ki yerimizi koruduk. Bu istikrarlı yönetim anlayışımız bize 'güven' ve 'büyüme' olarak geri döndü. Yılı kayıpsız bitirmenin ve hedeflerimize ulaşmanın haklı gururu içerisindeyiz.

## İHRACAT

Firmamız ihracat hedeflerine bir bir ulaşmaktadır. Ortadoğu pazarında birçok ülkede markamız yayılmaktadır. Dünyanın en prestijli fuarlarına katılarak Afrika ve Asya'da ki pazarımızı genişletmeye çalışıyoruz.

## KALİTE POLİTİKASI

Sağladığımız ürün ve hizmetlerde; müşteri memnuniyetini en üst düzeyde tutmak, müşteri geri bildirimlerini etkin bir şekilde yönetmek, değer yaratmayan işlemleri ortadan kaldırarak kaynakların etkin kullanımı ile zamanında teslimat yapmak ve sürekli iyileştirmeyi amaçlayan bir kalite yönetim sistemi oluşturmaktır. Bu doğrultuda ISO9001, ISO14001 ve ISO18001 belgelerini alıyoruz.

Çukurova Polistren müşterilerinin işlevsel gereksinimlerini en ekonomik ve teknik olanaklarla bağdaştırarak estetik ve modern projeler meydana getirir. Ürettiği projelerinde müşterilerinin hayallerini temel alarak güncel gelişmeleri çalışmalarına adapte ederek konforlu yaşam alanları tasarlar ve uygular ve projelerinde konfor, sağlamlık ve güzelliği ön planda tutmaktadır.

2012

### KURULDU

2000m<sup>2</sup>'lik tesisinde üretime başladı.

2013

### BÜYÜDÜ

Hızlıca piyasada sevilen bir marka haline geldi ve mevcut üretim tesisini genişletme kararı aldı ve üretim tesisini 7000m<sup>2</sup>'lik kapalı alana taşıyarak üretim kapasitesini kat ve kat arttırdı.

2013

2014

### BÜYÜMEYE DEVAM EDİYORUZ...

Şu anda 10.000m<sup>2</sup>'lik alanda üretime devam etmektedir.

### YENİDEN YAPILANMA

Haziran ayında elim bir kaza sonucu fabrikamızın bir kısmını yangında kaybettik. Güçlü ekibimiz ve birbirimize olan inancımızla çok kısa sürede toparlanarak 10 gün içerisinde O.S.B'de yeni bir fabrika ile üretime yeniden başladık.

2015  
HAZİRAN

2019

Değişen Ticari koşulları lehimize çevirerek verimli bir yıl geçirdik. Yeni fabrikamız için yer alımını yapıp projelere başladık.

GÜÇLENEREK  
DEVAM EDİYORUZ...

## İŞ GÜCÜ

Çukurova Polistren'de herkes kendi işinin lideridir; esnek organizasyon yapımız her çalışanın kendi işiyle ilgili konularda sorumluluk almasına ve inisiyatif kullanmasına olanak tanır. Çukurova Polistren toplamda 60 üretim çalışanı ve 15 idari personel ile hizmet vermektedir.

## FİYAT POLİTİKASI

Bölgemizde faaliyet gösteren inşaat Firmaları ve müteahhitlerin en çok tercih ettiği çalışma ve iş ortaklarından olan Çukurova Polistren; sağladığı kaliteli ürün ve hizmet anlayışının yanısıra uygulamış olduğu uygun fiyat politikasıyla da ayrıca bireysel tüketicilere de özel imkankar sunmaktadır. Toptan fiyatına perakende fiyattan satış yapan Çukurova Polistren böylece ev yaptıran ve yapmayı düşünenlerin bütçelerine ayrıca bir katkı sağlamaktadır.

*%98 EPS to be precise.*

*Nothing insulates better than air!*

### **WHAT IS EPS?**

EPS with the technical term Expanded Polystyrene, is a lightweight, rigid, plastic foam insulation material produced from solid beads of polystyrene. Expansion is achieved in a steamed process to form a perfectly closed cellular structure. These cells occupy approximately 40 times the volume of the original polystyrene bead. In a next step the material is moulded into appropriate forms suited to their application. EPS is 98% air, engineered air, the plastic material encapsulating the air, harnessing its benefit as an excellent insulation and shock absorption material.

**Yüksek dansite EPS ve XPS ürünlerin  
şekillendirilmesiyle elde edilir.**

**All the products are obtained with  
high density EPS and XPS.**

**كل المنتجات تصنع من مادة البوليسترين هي ذو كثافة عالية**

### Özellikler

1. Ürünlerin standart boyu 200 cm. dir
2. Beyaz renkli olup B1 sınıfı alev yürümez malzemedir.
3. Montajı kolaydır.
4. Uzun ömürlüdür.
5. İstenilen renk su bazlı boya ile elde edilebilir.
6. Yalıtım sağlar.
7. İnsan sağlığı için zararsızdır.
8. İstenilen model ve ölçüde üretilebilir.

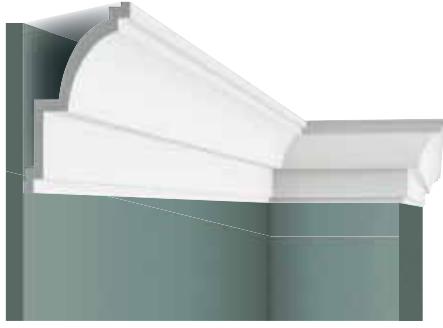

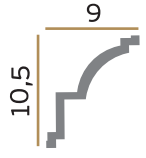

### Properties

1. Standard length: 200 cm.
2. Color: white Classification B1 unflammable products.
3. Simple assembly,
4. Life-time warranty
5. Different colors are available upon a request.
6. Crucial role of thermal insulation
7. No harm to human health
8. Different models and sizes are available upon a request

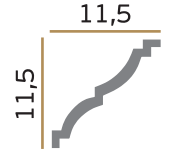

### الخصائص:

1. الطول القياسي ٢٠٠ سم
2. ذات لون ابيض تصنيفها... وهي مادة غير قابلة للاشتعال و الذوبان
3. سهولة التركيب
4. عمرها طويل
5. متوفرة بالوان متعددة حسب الطلب
6. لها قابلية للعزل
7. غير مضره بصحة الانسان. صديقة للبيئة
8. متوفرة باشكال و احجام مختلفة حسب الطلب

## EPS'İN TANIMI

Expanded Polisten Sert Köpük (EPS-Genleştirilmiş Polisten Sert Köpük), petrolden elde edilen, köpük halindeki, termoplastik, kapalı gözenekli, tipik olarak beyaz renkli bir ısı yalıtım malzemesidir.

Polisten taneciklerinin şişirilmesi ve birbirine kaynaşması ile elde edilen EPS (Genleştirilmiş Polisten Sert Köpük) ürünlerde, taneciklerin şişirilmesi ve köpük elde edilmesi için kullanılan şişirici gaz Pentan'dır. Pentan, tanecikler içinde çok sayıda küçük gözeneklerin oluşmasını sağladıktan sonra, üretim sırasında ve üretimi takiben çok kısa sürede hava ile yer değiştirir. Böylece EPS levhaların bünyesinde bulunan çok sayıda (1 m<sup>3</sup> EPS' de milyar) küçük kapalı gözenekli hücreler içinde durgun hava hapsolür. Malzemenin %98'i hareketsiz ve kuru havadır.

Üretimimin enerji yoğun olmaması, üstün teknik özelliklerine rağmen ekonomik olmasının diğer önemli sebebidir. Etkin mekanik dayanımın yanında şişirici gazın çok kısa sürede hava ile yer değiştirmesi, ürünün performansının kullanım ömrü boyunca sabit kalmasını sağlar. Kalınlığı incelmaz, ısı iletkenliği artmaz, özelliklerinde hiçbir bozulma meydana gelmez.

EPS üretiminde son aşama olan şekil verme (kalıplama) aşamasında, taneciklerin birbirleri ile sıkıca kaynaşması sağlanır. Bu uygulamanın başarısı, ürünün yüzeyindeki taneciklerin bal peteği şeklindeki görüntüsünden anlaşılır.

## KULLANIM YERLERİ

Yapıların yan duvar, teras çatı, zemin ve bodrumlarının sıcağa-soğuğa karşı yalıtımında, hafif prefabrik yapı elemanlarında, soğutma tesislerinde ticari depolarda, dilatasyon ve yağmur derelerinde, cam ve kırılabilir ürün taşımacılığında ambalajlamada balıkçılık sektöründe kalıp olarak kullanımı reklamcılık ve dekorasyon sektöründe ekspanda polisten köpük yaygın olarak kullanılmaktadır.

## DESCRIPTION OF EPS

Expanded Polystyrene Hard Foam is a kind of insulation material from petrol that is in the form of foam, thermoplastic, that has closed pore and typically white color.

In the EPS (Expanded Polystyrene Hard Foam) product which is obtained with blowing up polystyrene particles and then combination of these them, the gas used to blow up particles and obtain foam is "pentane": After providing formation of many small pores within particles, pentane replaces with air in a short period of time during the time of production and following the production. Thus, EPS is confined to stagnant air within the numbers (3.6 billion in 1 m<sup>3</sup> EPS) of very small closed porous cells in EPS plates. 98% of the material is still and dry air.

It is one of the other important reasons to be economic, despite its high technical specification, because production is not energy intensive. Replacement of blowing gas with air in a very short period of time as well as active mechanical resistance provides the performance of product to be stable during the use life. Its thickness does not becomes thin. its thermal conductivity does not increase and no deformation occurs in its specifications.

In the stage of shaping (moulding) that's the last stage in EPS production, tightly combination of particles is provided. Achievement of that application is seen through the honeycomb appearance of particles on the product surface.

## PLACES OF USE

Expanded polystyrene foam is commonly used for the insulation of constructions' side walls, terrace penthouses, ground floor and cellars against heat-cold, in the light prefabricated constructional elements, cooling facilities, commercial warehouses, dilatation and rain streams, transportation of glass and breakable product, packing, in the fishing sector as mould an advertising and decoration sector.

### تعريف البوليسترين

رغوة البوليسترين بين القاسية المتمددة الذي نحصل عليه من البترول بشكل رغوة و تكون لدنة و ذو لون ابيض التي تشكل بدورها احد مواد العزل الحراري.

ان انتفاخ حبات البوليسترين و تمازجها و اندماج الحبات مع بعضها ينتج لدينا منتج البوليسترين و لإتمام تمازج و اندماج و انتفاخ حبات البوليسترين مع بعضها البعض يتم استعمال غاز البنتان. بعد حدوث ثقب صغيرة في الحبات بفعل البنتان و اثناء تعقيب الانتاج في زمن قصير جدا تقوم بتغيير مكانها مع الهواء. وهكذا يتواجد في 1 م<sup>3</sup> من لوحة البوليسترين حوالي مليار ثقب مغلق صغير.

ويتم حبس الهواء داخلها و 98% من المواد تكون هواء جاف و ثابتة, وبسبب عدم كثافة طاقة الانتاج و وجود الخصائص التقنية تكون ذو تكلفة اقتصادية التي بدورها تسبب اهمية المنتج.

الى جانب فعالية ثباتها فان الغاز المسبب للانتفاخ تغير مكانها مع الهواء وفعالية استعمال المنتج تكون ثابتة مدى الحياة و لا يتم قلة سماكتها و لا تقوم ايضا بزيادة النقل الحراري و لا تتسبب بتخريب اي خاصية من خصائصها. اثناء انتاج اللوح البوليسترين في مرحلته الاخيرة يتم اعطاء الشكل النهائي للقلب و تضمن بذلك تمازج الحبات و تماسكها و نجاح هذه العملية يتضح من شكل توضع الحبات الذي يكون على شكل خلايا المنحل.

### امكان استخدامها:

الجدان الجانبية للمباني, تراس سطوح المباني, المداخل والمستودعات, عوازل للحرارة و للبرودة, في المباني مسبقة الصنع الخفيفة منشآت التبريد, المستودعات التجارية, المجاري المائية, الزجاج, املاج المواد القابلة للكسر, قطاع الاسماك يتم استخدامه كغالب, و لأغراض الدعاية و الاعلان والديكور خاصة تكون منتشرة بشكل كبير.

*Yüksek dansite EPS ürünlerin şekillendirilmesiyle elde edilen polistrene, birden çok kimyasal maddenin karıştırılmasıyla oluşan akrilik esaslı reçinenin kaplanmasıyla elde edilir.*

*All the products are obtained with shaping high density EPS with covering of acrylic compounds.*

**كل المنتجات مصنعة من البوليسترين هي ذو كثافة عالية مع خليط من مواد كيميائية متعددة كالاكرليك**

## Özellikler

1. Ürünlerin standart boyu 200 cm. dir.
2. Kaplama malzemesinin kalınlığı her yerde aynı olup polistrenden ayrılmaz.
3. Esnek bir yapısı vardır, darbeye dayanıklıdır.
4. Statik açıdan hafiftir, binaya yük getirmez.
5. İstenilen renk boya ile elde edilebilir.
6. Yalıtım sağlar.
7. İnsan sağlığı için zararsızdır.
8. İstenilen model ve ölçüde üretilebilir.
9. Uzun ömürlüdür

## Properties

1. Standard length: 200 cm.
2. The thickness of the coating is same everywhere and do not separate from the Polystyrene.
3. Flexible and resistance to cracks.
4. It is light, does not add load to the building.
5. Different colors are available upon a request.
6. Crucial role of thermal insulation.
7. No harm to human health.
8. Different models and sizes are available upon a request.
9. Life-time warranty

## الخصائص:

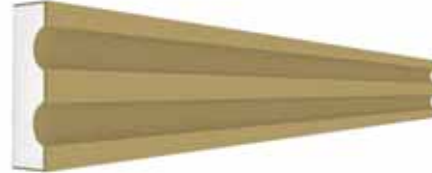

1. الطول القياسي ٢٠٠ سم
2. سماكة مادة الغطاء نفسها في كل مقاطع البوليسترين
3. مطاوعة ولها مقاومة ضد الكسر
4. ذات وزن خفيف و بالتالي لا تضيف احمال زائدة على المبنى
5. متوفرة بالوان متعددة حسب الطلب
6. لها قابلية للعزل
7. غير مضره بصحة الانسان
8. متوفرة باشكال واحجام مختلفة حسب الطلب
9. صلاحية مدى الحياة
